DEAF CENTER — TECH RIDER

– **Piano** (preferably grand. upright piano + nord lead stage piano is possible in special cases) - The piano must be In tune!
– **Microphones & stands** to mic up piano + **1 extra microphone** on the piano that will be run through Erik´s pedal setup *(xlr to jack cable)*
– **Stereo DI**
– **Monitoring for both**

+ ***OPTIONAL***
– Guitar amplifier. Warm sounding, 2x12” ala Fender Twin / Jazzmaster o.s.
– Mixing console, 4chan minimum (incl. aux in/out. At least 2 XLR plugs)
!! please let us know in advance if there is a mixer and/or guitar amp available !!

The extra microphone on the piano will be used to channel the sound of the piano into Erik´s pedal setup. If a guitar amp is present, the DI signal from Erik will be linked to the amp. Then amp is then micked and the amp + DI signal is mixed.

We´d love a good soundcheck, as we play so seldom and it´s good to calibrate and prepare properly. 1 hour minium. More is very welcome!
