

FAUNA - Tech Rider

PA system suitable for size of room, 4 channels (QUAD) with subwoofer

Big table - 4 audio lines from table to PA. 1/4inch output from my laptop interface

1 Audio Monitor on stage

1 X AC powerstrips

Live Camera (with operator or in a tripod) pointing to my table of instruments connected to the projector feed that can show close-ups and details from the instruments and my interactions with them.

Projection screen

SET UP TIME + SOUND CHECK : 90 min - It is very important that I can test the exact light situation during soundcheck since I have light sensors in the instrument I am using that will be affected by the light conditions.

Performance length: 35 min aprox
