

ALE HOP

TECH & HOSPITALITY RIDER

All questions to be directed to: [mo\[at\]media-loca.com](mailto:mo[at]media-loca.com)

RIDER

PA

The artist needs a PA system and a sound engineer.

MONITORING

2x Monitors (stereo), with suitable amplification and independent EQ from PA.

EQUIPMENT

The promoter needs to provide the following technical equipment:

- 2 x Active DI Boxes (for a Computer)
- 2 x Guitar Amplifiers (both "combo" and very similar in size and power, preferably identical brand and model)– Fender Champ, or Fender Blues Junior, or Fender Twin, or Roland Jazz Chorus or similar (should be miced)
- 1 x Microphone for voice (processed into the Computer)
- 1 x Microphone Stand
- 1 x Multiplugs x 220 Volts w/ European input plug
- 1 stool to sit
- 1 small table (max 60 cm height). Can be a small 'cube/box covered with black cloth, (around 50cm x50cm x 50cm), an equipment or flight case, or a coffee table.

The artist will bring with her:

- 1 x Computer
- 1 x Soundcard
- 1 x Electric Guitar
- Modular FX

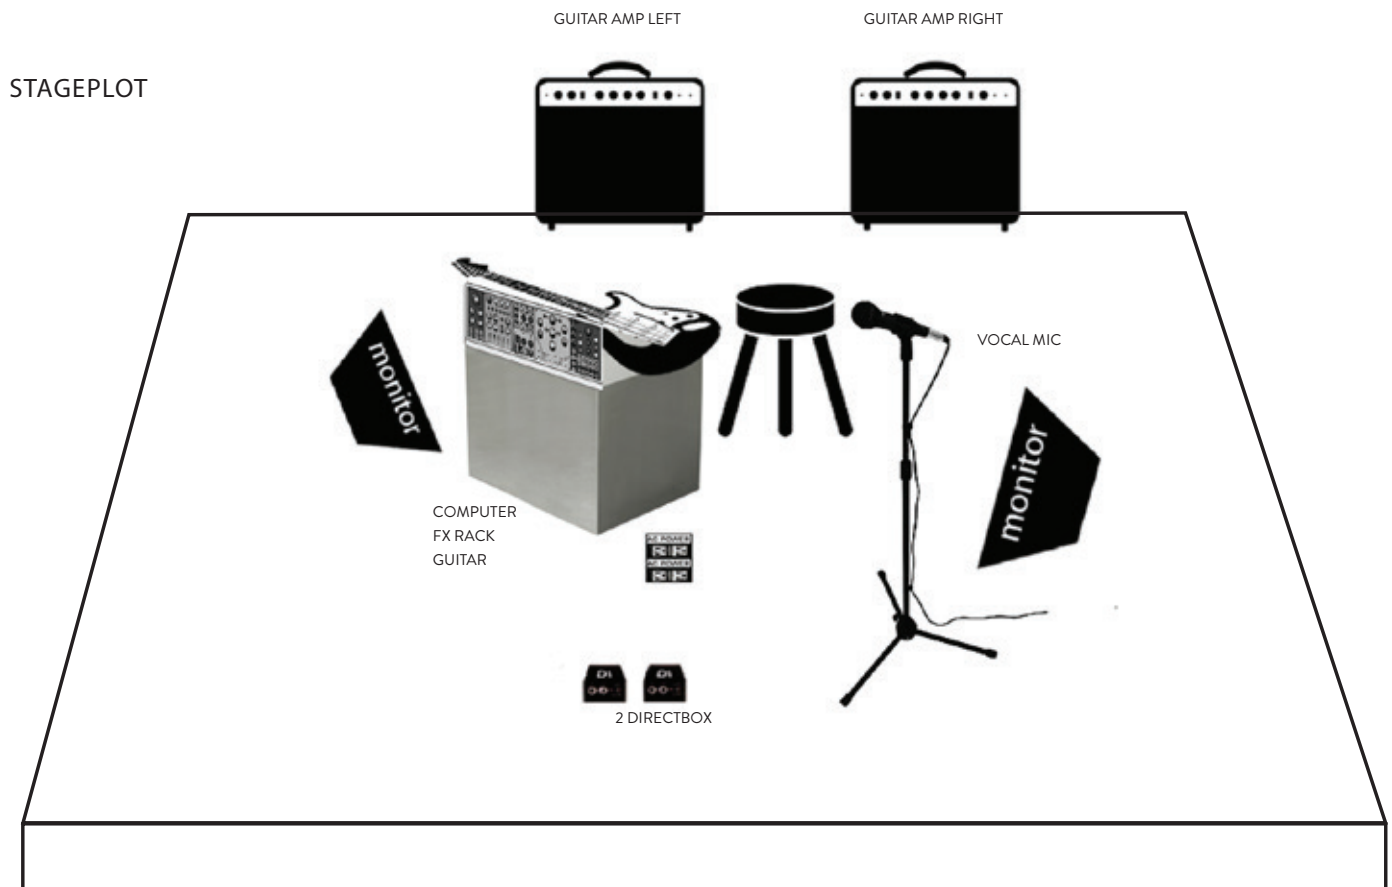

SOUNDCHECK

The artist needs 30 minutes for soundcheck.

She uses 2 channels in the main mix:

Line 1/2

Computer, processed guitars in stereo (previously passed through both guitar amp, we need two identical guitar amps because the signal goes out of the modular in a stereo signal), and processed voice. Has frequencies all over the spectrum, it should not be lowcut, nor highcut. Usually she needs to EQ directly in the computer to avoid feedback from the microphone.

LIGHTING/AV

The show has a video. The artist will bring a USB stick with an mp4 video (1920 x 1080 px) file to be reproduced from a computer or a video mixing console available. In case there is no device available to reproduce the file please notified with reasonable time prior so the artist can plan to bring an extra computer or device to reproduce the file.

Lights should be focused and pointing on what she is doing on stage, avoid ambient light washing out the image on the projection.

CATERING & HOSPITALITY

A private, secure area safe enough to store equipment.

Refreshments:

- Water
- Red Bull, or coffee
- Non-alcoholic beer

(No dietary or food restrictions.)

FLYING TRAVELING SPECS

1 hand baggage item: carry-on 10 kg (50 x 40 x 20 cm) - normally goes in the plane as hand luggage. (In Ryanair it is only allowed the 10kg carry-on on the plane with "priority boarding".)

1 check-in baggage item: (15 kg) for the electric guitar that goes in a hardcase. (In Ryanair it needs to be specially bought as "instrument" baggage.)

SHOW INFO

Title of the show: 'Ale Hop, Live A/V'

Duration: 40 minutes
